E. Operating Loss and Tax Credit Carryforwards

At March 31, 2019 the Company had no net operating loss carryforwards or capital loss carryforwards.

The following is income tax expense for the current and prior years that is available for recoupment in the event of future net losses:

Year	Ordinary	Capital	Total
2019	\$ 3,654,017	\$ 6,345	\$ 3,660,362

At March 31, 2019 the Company had no protective tax deposits under Section 6603 of the Internal Revenue Code.

F. Consolidated Federal Income Tax Return

- The Company's federal income tax return is consolidated with the following entities:

Cincinnati Financial Corporation (Parent)
The Cincinnati Insurance Company
The Cincinnati Life Insurance Company
The Cincinnati Casualty Company
The Cincinnati Indemnity Company
CFC Investment Company
CSU Producer Resources, Inc.

- The method of allocation between the companies is subject to a written agreement, approved by the Board of Directors, whereby allocation is made primarily on a separate return basis, with the company receiving a current benefit for losses generated to the extent federal taxes are reduced for the consolidated tax group.

G. Federal or Foreign Income Tax Loss Contingencies

The Company did have tax contingencies under the principles of SSAP No. 5, *Liabilities, Contingencies and Impairment of Assets*. As of March 31, 2019, we had a gross unrecognized tax benefit of \$2.3 million. This amount carried is for an unrecognized tax benefit for 2018. The entire amount of our liability, if recognized, would impact the effective tax rate. We

NOTES TO FINANCIAL STATEMENTS

believe that it is reasonably possible that a decrease for the full amount of our \$2.3 million of unrecognized benefits, all of which relates to our tax base insurance claims and reserve deduction, may be necessary within the coming year. Such a decrease is possible when the IRS processes our income tax return filing for the 2018 tax year. This gross unrecognized tax benefit of \$2.3 million has been netted for a final current federal and foreign income tax payable of \$9.3 million. The Company is primarily subject to examination by U.S. federal and various U.S. state and local tax authorities. The statute of limitations for federal tax purposes has closed for tax years 2014 and earlier. The statute of limitations for state income tax purposes has closed for tax years 2014 and earlier. There are no U.S. federal or state returns under examination.

20. Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Included in various investment related line items in the financial statements are certain financial instruments carried at fair value. Other financial instruments are periodically measured at fair value, such as when impaired, or, for certain fixed maturities and preferred stock, when carried at the lower of cost or market.

The fair value of an asset is the amount at which that asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. The Company does not have any material liabilities carried at fair value.

The Company has categorized its financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level that is significant to the fair value measurement of the instrument.

Financial assets that fall within Level 1 and Level 2 are priced according to observable data from identical or similar securities that have traded in the marketplace. Also within Level 2 are securities that are valued by outside services or brokers where the Company has evaluated the pricing methodology and determined that the inputs are observable. Financial assets that fall within Level 3 of the hierarchy are valued based upon unobservable market inputs. Pricing for each Level 3 security is based upon inputs that are market driven, including third-party reviews provided to the issuer or broker quotes. However, the Company places in the Level 3 hierarchy securities for which it is unable to obtain the pricing methodology or it could not consider the price provided as binding. Management ultimately determines the fair value for each Level 3 security that it considers to be the best exit price valuation.

The Company primarily bases fair value estimates for investments in equity and fixed-maturity securities on quoted market prices or on prices from a nationally recognized pricing vendor, an outside resource that supplies global securities pricing, dividend, corporate action and descriptive information to support fund pricing, securities operations, research and portfolio management. The Company obtains and reviews the pricing service's valuation methodologies and related inputs and validates these prices by replicating a sample across each asset class using a discounted cash flow model. When a price is not available from these sources, as in the case of securities that are not publicly traded, the Company determines the fair value using various inputs including quotes from independent brokers. In these circumstances, the Company has generally obtained and evaluated two nonbinding quotes from brokers; its investment professionals determine the best estimate of fair value. The fair value of investments not priced by a pricing vendor is less than 1 percent of the fair value of the Company's total investment portfolio.

Financial instruments are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1—Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in active markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.
- Level 2 – Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets and liabilities that are actively traded. This also includes pricing models for which the inputs are corroborated by market data. The technique used for the Level 2 fixed-maturity securities is the application of market based modeling. The inputs used for all classes of fixed-maturity securities listed in the table below include relevant market information by asset class, trade activity of like securities, marketplace quotes, benchmark yields, spreads off benchmark yields, interest rates, U.S. Treasury or swap curves, yield to maturity and economic events. Level 2 fixed-maturity securities are primarily priced by a nationally recognized pricing vendor.
- Level 3—Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs

NOTES TO FINANCIAL STATEMENTS

include the following:

- Quotes from brokers or other external sources that are not considered binding;
- Quotes from brokers or other external sources where it cannot be determined that market participants would in fact transact for the asset or liability at the quoted price; or
- Quotes from brokers or other external sources where the inputs are not deemed observable.

Reclassification of certain financial instruments may occur when input observability changes. Reclassifications are reported as transfers into/out of the Level 3 category.

The following table presents the Company's assets measured and reported at fair value by level within the fair value hierarchy as of March 31, 2019:

Assets at Fair Value:

	Level 1	Level 2	Level 3	Total	Net Asset Value (NAV) Included in Level 2

22. Subsequent Events

The Company has considered subsequent events through May 14, 2019, the date of issuance of these statutory financial statements. There were no events occurring subsequent to March 31, 2019, which may have a material effect on the Company.

23. Reinsurance – No significant change

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination – Not applicable

25. Changes in Incurred Losses and Loss Adjustment Expense

Reserves as of December 31, 2018, \$290,850,483. As of March 31, 2019, \$24,286,368 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$263,861,287 as a result of re-estimation of unpaid claims and claim adjustment expenses principally on commercial casualty lines of insurance. Therefore, there has been \$2,702,828 favorable prior-year development since December 31, 2018 to March 31, 2019. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Because the Company does not write retrospectively rated policies, prior-year development does not affect premium adjustments.

There were no changes in methodologies and assumptions used in calculating the reserve for loss and loss adjustment expenses at March 31, 2019.

26. Intercompany Pooling Arrangements – Not applicable

27. Structured Settlements – Not applicable

28. Health Care Receivables – Not applicable
